Work Experience

Socium Partners

Frontend Developer *Intern*   10/2022-12/2022

Socium Partners   1/2023 – 2/2024
Frontend Developer
- As a **Frontend Developer** at a reputable firm, I honed my skills in web development using a diverse set of technologies, including **HTML, CSS, ReactJs** and **Wordpress**.
- I actively contributed to building dynamic and responsive web applications while integrating API's.
- Collaborated with **cross-functional** teams to gather requirements, **plan projects**, and deliver solutions within deadlines.
- **Designed, developed**, and maintained Employee management dashboard, house **rental admin panel, Super admin Dashboard**, enhancing user experience and functionality. Adept at designing and developing user-friendly interfaces and robust **Frontend systems.**
- Utilized testing tools such as **Jira, Bitbucket**, and **Git** for version control and issue tracking, ensuring code quality and collaboration among **team members**

OSBEAM IT PVT. LTD.   3/2024 - Present
Frontend Developer
- Frontend Developer with experience building modern **web applications** at Osbeam IT Pvt Ltd using **ReactJs** and **WordPres**s.
- As a Frontend Developer at Osbeam IT Pvt Ltd, I have successfully **developed websites**.
- The first is **osbeamit.com**, built on **WordPress**. The second, **shawniks.com**, is a React.js application that I published on a **domain** using **Hostinger** with API integrations.
- The third website is a **full-stack** application that combines a fully functional **frontend** and **backend** using **React.js** and **Node.js.**
- Developing an **Admin Dashboard** and **HR Dashboard** to manage data manipulation and track employee activities, including report and attendance.

Projects

Cohousy | *ReactJs, JavaScript, Ant Design, HTML/CSS, Bitbucket, Rest Api integration*
- Developed the **Cohousy house rental** platform. As part of this initiative, I played a role in creating the Cohousy Admin Panel using **ReactJs, Ant Design and CSS**.
- Implemented comprehensive **CRUD** (Create, Read, Update, Delete) operations to efficiently manage **room allocations**, **tenant details**, and other critical data.
- Designed and seamlessly **integrated APIs** for the Cohousy Admin Panel, facilitating efficient management of tenant rooms, payments, services, and complaint details.

Share & Care Website/*Wordpress, Elementor, CDN (Cloudflare), Hostinger*
- Contributed to the development of Share & Care, a **mental health support platform** designed to connect individuals seeking guidance with experienced experts.
- Architect the Share & Care mental health support platform using **WordPress**, incorporating multiple **plugins** and **custom CSS** to enhance functionality and aesthetics.
- Employed **responsive design** principles to ensure seamless user experience across various devices.
  Successfully deployed and hosted the platform on **Hostinger**

Share & Care Admin Panel / *ReactJs, JavaScript, HTML/CSS, Ant design, Api Integration*
* Led the development of the **Admin** and **Super Admin** panel's frontend, responsible for maintaining comprehensive user, expert, and admin details sourced from the database.
* Implemented seamless API integration to populate the frontend using **ReactJS, Ant Design,** and **CSS**. Executed **CRUD** (Create, Read, Update, Delete) operations to efficiently manage data.
* Thoroughly tested APIs using **Postman**, ensuring robust functionality and a seamless user experience across the panels.

Osbeam website / *Wordpress, Elementor, Plugins.* **URL:** *osbeamit.com*

* Developed the **website** of Osbeam IT Pvt Ltd using **WordPress** which included multi pages such as **services**, **blog**, **contact us**, etc. for generation of leads.

* Designed a modern and effective layout by implementing the **Elementor** plugin and **Astra** theme.

* Made sure to test and fully fit the design on different ranges of the screens.

Shawniks website / *Reactjs*   URL: *shawniks.com*

* Created a site Shawniks that serves as a platform for the financial services offered by the company.

* Utilized front-end technologies — **React.js, HTML, CSS** and included various **APIs**.

* Engaged the audience by including cards, forms as well as a carousel in different sections designed.

* **Designed** an easy EMI calculator for the accurate calculations to the users.

Shaw Associates website / *Reactjs, Nodejs, MongoDB, React Slick, Rest API, Git, Ant Design*   URL: *shawassociates.in*

* Shaw Associates is a **full-stack web application** project where the front part has been developed with **React.js** and the backend with **Node.js**.

* **APIs** were created and integrated so that the external and internal data flow could be maintained without implementation of performance degradation.

* **Full Stack Development** – performed **frontend** and **backend** development for application, with application Build as React.js and data management and **server-side** programming done in **Node.js** with **MongoDB**.

* **Authentication** and **authorization** processes were designed and developed in the application, also created **protected routes** for the application that could be accessed only by authorized users.

* The website was developed with **service** pages, **blog** pages, a contact page and login and registration features for the administration of users.

* **React Slick** was incorporated for a Testimonial Slider for a **better experience** and UI.

* Difficulties in ensuring adequate display of the design and effective interaction with users with the website made to **work on all devices.**

SNS Admin and Hr Panel │ *Reactjs, Ant design, Rest Api*
* Developed an **Admin Panel** to manage cold and lead call data, enabling data manipulation for mobile users and **maintaining real-time** status updates from the mobile end
* Implemented **CRUD** (Create, Read, Update, Delete) operations for efficient data management.
* Built an **HR Panel** to manage employee attendance, allowing approval or rejection of attendance records, as well as handling leave requests submitted via the **mobile app**.
* Integrated features in the HR Panel for employee **registration**, **generating offer letters**, and **salary slips** Through the Hr docs module.

Education
